EMA recommendation summary	Gives a clear (summarized) description, in their own words, and a thorough analysis of the EMA recommendations for the specific disaster preparations.	Gives a fairly clear picture of what they are trying to summarize. Gives a superficial analysis of the EMA recommendations.	Description of the EMA recommendations is incomplete. Analysis is minimal.	Description and/or is incorrect or missing.

Group score:	12-15 points	8-11 points	4-7 points	0-3 points	
Written description of vulnerable population	Gives a clear and thorough description of the vulnerable population, including all the details, accurately: numbers of people, demographics, risk factors, results, and supporting agencies and/or individuals. Has proper source documentation (APA format).	Gives an accurate, but broad description of the population, providing minimal details. References are listed, but all are not from trustworthy sources or APA form is not followed.	Description of the vulnerable population is missing a few key details. Not all information is referenced.	Information about the vulnerable population is incorrect and/or several key details are missing. Or no referencing of sources.

Group score:	15-20 points	10-14 points	5-9 points	0-4 points	
Flyer	The content is formatted in an easy-to read fashion, similar to examples on the EMA website. Recommendations are summarized in a way that would appropriate to the vulnerable population. If a written flyer would not be an ideal way to communicate with the population, comments to that effect are attached to the upload and the agencies or individuals being targeted by the flyer (in lieu of the vulnerable individuals) are noted.	Content is complete but is hard to read (not summarized well or presented poorly). If a written flyer would not be an ideal way to communicate with the population, comments to that effect are attached to the upload and the agencies or individuals being targeted by the flyer (in lieu of the vulnerable individuals) are noted.	The content is lacking some details. if a written flyer would not be an ideal way to communicate with the population, comments to that effect are attached to the upload and the agencies or individuals being targeted by the flyer (in lieu of the vulnerable individuals) are noted, but may be slightly insufficient.	Content is incomplete. Many major details are missing or the information is incorrect. If a written flyer would not be an ideal way to communicate with the population, comments to that effect are attached to the upload and the agencies or individuals being targeted by the flyer (in lieu of the vulnerable individuals) are NOT noted.	

Video The content is presented in an organized fashion is easy to follow and instructions are clear. Video and sound are of good quality. Becommendations are presented for the vulnerable presented for the vulnerable projection. Commend to the a ideal way to communicate with the population, comments to that effect are attached to the upload and the agencies or individuals in the upload and the agencies or individuals in the agencies individuals in the agencies or individuals in the agencies indinthe agencies individual
